

Name _____

Per. _____

Searching Assignment #1 –

Go through the below steps to complete today's Internet challenge. Turn in when completed.

Sample Problem: You need to find reasons behind the high rate of diabetes and Alaska Natives and the disease's effects.

Step 1. Define the problem and name the essential question

Essential question (write the problem in a question form) :

Step 2. Write out 3-4 main words you will be searching for & brainstorm for more ideas. Use either listing or bubbling for your brainstorming.

Step 3: Write out a possible search string. Choose 3-4 words you think will work:

Step 4: Test it! Go to Infotrac Health Database and test your search string. If you get no results, you try again using a different string.

Write down the name of two articles found:

- 1.
- 2.

(over)

Step 5. Rate your success.

Did your search string give answers to your essential question?

1. I found many different sites that look promising
2. I found one or two that looked good, the rest were not helpful
3. I found no useful sites
